Education

Dr. A.P.J. Abdul Kalam Technical University — Greater Noida, UP
Bachelor of Technology in Computer Science and Data Science — *2023 – 2027*

Skills

Programming Languages: JavaScript, TypeScript, C, C++, Python, PHP
Web Development: ReactJS, NextJS, NodeJS, ExpressJS, MongoDB, MySQL, Tailwind CSS
Other Skills: Git/GitHub, Supabase, Docker

Projects

Gohyred — gohyred.com

- Architected and developed a comprehensive career management platform that aggregates opportunities from multiple sources into a centralized, real-time dashboard.
- Created an AI-driven profile optimization feature that parses user-uploaded PDFs to extract skills and match candidates with relevant job opportunities.
- Delivered a robust, scalable backend architecture using Next.js API Routes and PostgreSQL, ensuring secure data management and fast query resolution.
- Developed a high-performance data pipeline using Redis and BullMQ to orchestrate web scraping tasks via Puppeteer, aggregating jobs across multiple platforms.

Vibly Chat — vibly-chat.vercel.app

- Architected a secure messaging pipeline using the native Web Crypto API. Implemented ECDH (P-256) for secure key exchange and AES-256-GCM for message encryption, ensuring private keys never leave the client's device.
- Integrated Pusher WebSockets to deliver a zero-latency chat experience, complete with live typing indicators, instant read receipts, and real-time connection status updates.
- Designed a modular RESTful API using PHP 8+, utilizing a custom router and rate limiting to handle requests securely in a serverless Vercel environment.
- Crafted a fully responsive, modern frontend using Vanilla CSS and JavaScript, featuring smooth micro-animations, responsive layouts, and dynamic Light/Dark mode syncing with system preferences.

Valenzy — https://valenzy.vercel.app/

- Created a responsive web application for organic chemistry, featuring periodic table integration and automated calculations like molar mass.
- Improved problem-solving efficiency for students through a user-friendly interface.

Achievements & Certificates

- Open Source Contributor, GirlScript Summer of Code (GSSoC) 2025 — July 2025 – October 2025
- Hackathon of the Vespera '24 – Guru Gobind Singh Indraprastha University (GGSIPU), Delhi
- ASTRA 2025 Hackathon – Delhi Technological University (DTU)
- Co-Founder of Gohyred.
- Secured 1st Position (Champion) in the District-Level Robo Sumo Competition, demonstrating skills in robotics, engineering, problem-solving, and teamwork.
- Represented the district at the State-Level Robo Sumo Competition and secured 4th Position.
